MOT TEST LANES

WES
WORKSHOP EQUIPMENT SOLUTIONS

Driver & Vehicle Standards Agency

Apply to open, run or change an MOT testing station

You can use this service to apply to open an MOT testing station, or to make changes to an existing one, for example:

- change the site address
- add an additional class or vehicle type you want to test
- replace equipment

Introduction
Type of application

MOT authorisation number application Select the application to create based on the authorisation number	What it is for
☐ Apply to open an MOT testing station	A, B, or A & B
☐ Add a vehicle class to an MOT testing station	A, B, or A & B
☐ Change the name and/or address of an MOT testing station	A, B, or A & B
☐ Change an MOT equipment item	A, B or A & B (ATL)

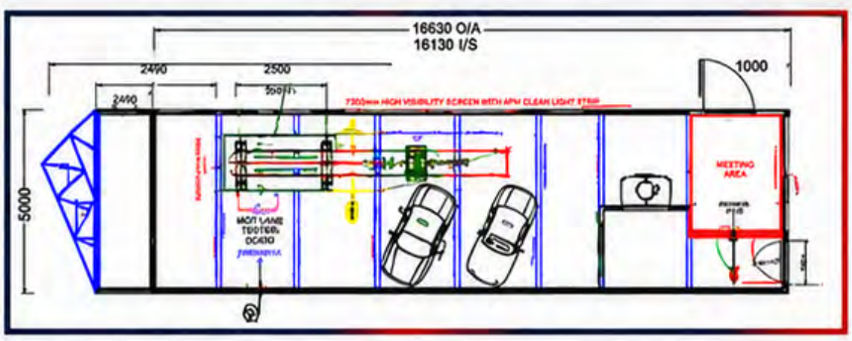
MOT testing station application	What it is for
☐ Apply to run an MOT testing station	A, B, or A & B
☐ Apply to convert an existing MOT testing station from one type of test lane to another (for example, ATL to ATL)	A, B, or A & B
☐ Apply to remove a vehicle class from an MOT testing station	A or B
☐ Apply to close an MOT testing station	A, B, or A & B (ATL or OPTL)

VT01/21 August 2021

Each MOT Bay journey begins with a DVSA VT01 application and CAD design drawings. Our experts are experienced in assisting garage owners with gathering the necessary information and documentation. Several procedural steps must be completed to establish a functional and effective MOT testing facility.

Our expertise built on decades of experience allows us to configure and deliver your ideal MOT testing bay should it be a pit, 4 post or versatile scissor lift bay.

The DVSA MOT testing requirements can be a minefield and potential disaster should the interpretation be mis-understood however we can ensure the process will be a seamless transition by means of carrying out an accurate site visit to measure the proposed premisses so that a detailed CAD drawing is produced to illustrate the essential dimensions and specifications required by the DVSA. This information ensures that the layout complies with the DVSA requirements and formulates a crucial part of the approval process.



MOT TEST LANES

WES
WORKSHOP EQUIPMENT SOLUTIONS

- Comprehensive range of MOT small tools & ancillary products
- Includes shadow boards, mobile exhaust extractors, hand lamps, safes and essential workshop items
- All products selected to help meet DVSA requirements with confidence
- Reliable supply from Workshop Equipment Solutions to support complete MOT installations
- MOT application support available to help you get your station approved

- Class 4/7 MOT Inspection Pit Package
- Our MOT pits are built from heavy-duty mild steel for strength and durability.
- CE-marked and ISO certified, they include jacking rails, lighting, and air lines, with custom options available.
- Installed seamlessly into new or existing floors for a stable, reinforced finish.

MOT TEST LANES

WES
WORKSHOP EQUIPMENT SOLUTIONS

MOT test lanes are specialised, DVSA-approved equipment used for vehicle inspections, ranging from standard layouts to Automated Test Lanes (ATL) or One Person Test Lanes (OPTL).

These lanes are designed for Classes 1, 2, 4,5L and 7, allowing for efficient, often single-person, testing of motorcycles, cars, and commercial vehicles using integrated equipment.

Jacking Beams, Scissor Lifts, 4 Post Lifts, Headlamp Beam Testers, Brake Testers and Combination Emissions Testers are all crucial bits of equipment required to operate as an approved DVSA MOT Testing Station.

2 POST LIFTS

5T
Wireless Connectivity

Wireless hydraulic operation
5.0T Lifting capacity
110mm Min. pad height
1.9m Max. Lifting height
2.9m Drive-through width
Symmetric lifting arms

Technology allows precise lifting/lowering of a vehicle is an innovative 5.0t 2-post lift that operates without physical connection between the columns. This lift is highly robust and designed for the professional lifting of various vehicles, including those with larger wheelbase. Its design features a "clear floor" working area, enhancing convenience and adaptability for current and future vehicles. The absence of a gantry between the columns allows for better adaptability in workshops with lower ceiling heights than traditional baseless lift designs. This lift includes key features from our other 2-post lifts, such as the Accurate Positioning System and anti-corrosion protection for long-term, intensive use.

4-5T Lifting capacity
90mm Min. pad height
1.9m Max. Lifting height
2.5m Drive-through width
Asymmetric lifting arms
Electro-hydraulic operation
Capable of adapting for interchangeable EV-Lifting forks.

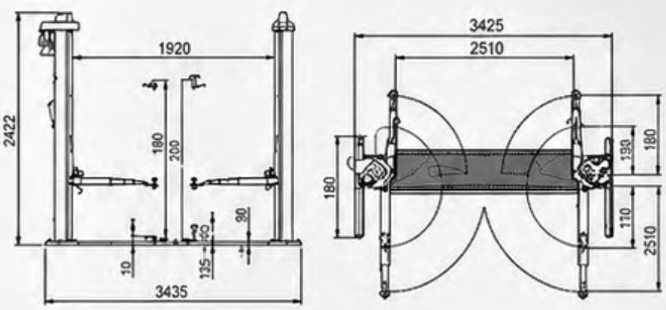
2 POST LIFTS

WES
WORKSHOP EQUIPMENT SOLUTIONS

With a lifting capacity of 3-3t and flexible asymmetric lifting arms, it effectively accommodates a wide range of vehicles, including cars, vans, and 4x4s. Its design features a compact drive-over frame between the posts and a low pick-up point of just 90mm.

Lift with self supporting base frame for easier installation on poor quality floor surfaces.

Pads with a min. height of 90 mm only. Three stage short and long arms enabling the asymmetric loading of wide and longer vehicles recommended for the lifting of off-road vehicles



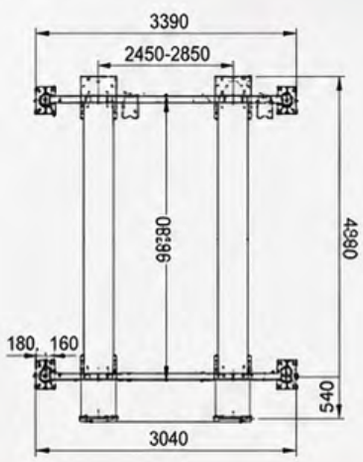
Our 2 post lift ranges includes based, baseless and wireless technology models with different lifting capacities ranging from 3T to 7T to accommodate various workshop needs and requirements. Whether you have a car, long wheel base van or electric vehicle we are able to supply the right lift to suit your workshop

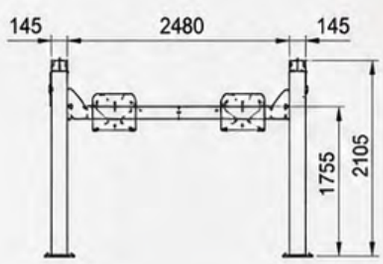
4 POST LIFTS

WES
WORKSHOP EQUIPMENT SOLUTIONS

A sturdy 4-post lift that's perfect for car workshops. It's designed especially for tasks like wheel alignment, general repairs, and servicing. This lift can handle a lot of weight, with a lifting capacity of 5.0t, and the platforms are 4.8m long, accommodating a wide range of vehicles. For wheel alignment specifically, it has a smaller auxiliary lift that can lift 4.0t. It also has features like rear slip plates and recesses for turn plates, making it easy to adjust the wheels.

When you require a 4 post lifting solution for a tight space or you need to replace an existing MOT lift
We have the solution just for you.
Our 4 post lift options offer a wide range of platform lengths and lifting capacities from 3.5T to 30T.
We offer a selection of lifts specifically for ATL, OPTL or MOT testing, complete with built in play detectors and radius turn plates.





4 POST LIFTS

WES
WORKSHOP EQUIPMENT SOLUTIONS

Recessed play detectors and radius plates

The ultimate ATL and MOT testing solution for professional garages seeking versatility, safety, and efficiency. Available in 4.0t or 5.0t lifting capacities and platform lengths up to 6.5M these lifts are engineered to meet the demanding requirements of MOT and ATL testing for Class 4 & 7 vehicles, while also serving as dual revenue lifts, perfect for both MOTs and wheel alignment work.

With a robust structure and build quality, but at a larger length than it's 4 tonne equivalent, this lift is ideal to fit the larger workshop. With an impressive lifting capacity and a range of ramp setting from 800 to 1025 mm, allowing you to adjust the lift to fit different vehicles. The addition of a 3 Ton jacking beam and a remote control panel, makes this a very versatile and capable lift.

SCISSOR LIFTS

WES
WORKSHOP EQUIPMENT SOLUTIONS

A scissor lift maximises your workshop's usable space while facilitating seamless access to elevated vehicles. Whether you require a surfaced mounted or recessed variant the space saving options are endless.

The electrohydraulic system features a robust four-cylinder structure, allowing it to lift an impressive weight of up to 4.0t easily. When fully lowered, the lift achieves a remarkable compact height of just 105mm for a surface mounted version or completely level with your existing floor for the recessed variant, ensuring it occupies minimal space in your workshop.

Mobile, short platform, mid-rise scissor lift developed for fast-fit/tyre shops. Its compact design allows for easy relocation and provides a wheel-free lifting solution that saves time and money, especially when quick access & wheels, brakes, and most steering & suspension components is required. The lift is fully mobile and can be effortlessly moved around the workshop.

SCISSOR LIFTS

WES
WORKSHOP EQUIPMENT SOLUTIONS

Suitable for ATL/MOT testing, Wheel alignment and general Repair/Servicing

When your workshop is tight for space and you require a lift and nothing seems to fit, a scissor lift is the option not only for tight spaces but for a clean modern look for today's workshops.

The solution of a scissor lift provides a versatile and space saving alternative to 2 and 4 post lifts. Various platform lengths offer the complete solution to any job you may have to undertake. Whether you are carrying out a general service/repair, vehicle geometry check, tyre changing or MOT inspection test we have the perfect options for you.

TYRE CHANGERS

WES
WORKSHOP EQUIPMENT SOLUTIONS

Total Automation

LEVERLESS DESIGN

Meeting the demands of the busiest tyre shop, allow wheel specialist handling delicate rims, or prestigious main dealer, our tyre changers are built to do a job, not built to a price. Already well established in the UK, our tyre machines have been sold in the UK under different brand names for decades, and for the past 20 years or more have been the most widely used – in fact, you probably already own one and don't even realise it!

WHEEL ALIGNMENT

WES
WORKSHOP EQUIPMENT SOLUTIONS

Offering wheel alignment services is of utmost importance in the aftermarket motor trade. Wheel alignment plays a crucial role in optimising a vehicle's performance and fuel efficiency, and regularly aligning the wheels ensures that the vehicle drives properly. With the increasing awareness of the benefits of wheel alignment amongst drivers along with the perilous state of the UK's roads, the demand for these services continues to grow. As a result, incorporating wheel alignment services into a workshop can attract more customers and increase profitability.

The Bluetooth Lite Wheel Aligner is an entry level 5 sensor CCD 4-wheel aligner and our most cost-effective wheel alignment equipment. We believe it to be the best value available anywhere, and it offers an entry into a profitable market for smaller workshops and tyre bays.

The popular Bluetooth Pro wheel alignment features 6 sensor CCD four wheel" alignment technology and is fully wireless using the latest Bluetooth communication for fast and easy use.

3D Wheel alignment for passenger's cars and LCV's, 3D camera imaging with automatic variable height through **motorized camera beam**. Motorized camera beam from PC keyboard. Fast and simple

HGV EQUIPMENT

WES
WORKSHOP EQUIPMENT SOLUTIONS

If you are looking for an equipment solution for the heavy goods vehicles in the fleet, we have the perfect fit to fix your requirements. Whether it's a set of column lifts, headlamp beam tester or even a brake tester, we can supply the equipment to get your workshop functioning.

The right equipment choices are what makes the difference between an easy job becoming difficult, or even worse, a difficult job being made impossible. Workshop Equipment Solutions can help make your choices a stressless task with a profitable outcome. Call our team for a discussion about how we can help you.

HGV WHEEL BALANCER

Heavy duty wheel balancer for trucks, buses and commercial vehicles. Accurate, reliable and easy to use with a robust design built for everyday workshop use.

HGV TYRE CHANGER

Heavy duty tyre changer designed for trucks, buses and agricultural vehicles. Powerful performance, versatile clamping and built to handle large wheels with ease and safety.

AIR CONDITIONING

WES
WORKSHOP EQUIPMENT SOLUTIONS

ClimaXtreme

G&R AUTOMOTIVE AIR CONDITIONING

KK4

Fully automatic automotive AC service stations designed for the professional workshops.

Capable of servicing **a range of refrigerant** type air conditioning systems.

Modern low emission refrigerants are used in the majority of passenger cars, light commercial and HGV vehicles today, and these machines can handle the complete service cycle automatically including refrigerant recovery, vacuuming, leak testing, oil extraction, UV dye injection and recharging, reducing service time and minimizing service time and minimizing downtime and maximising profitability.

KEY FEATURES

- Compatible with, R134a, R1234yf, R456a and R444a
- High capacity compressor
- Enhanced ventilation
- Ultra fast recovery and vacuum
- Precision digital scale
- Tablet Samsung® 8.5"
- Integrated database for, Cars, HGV and Agricultural vehicles
- Software updates via WIFI

SK01

DIAGNOSTIC & ADAS SOLUTIONS CTR

WES
WORKSHOP EQUIPMENT SOLUTIONS

Having the right diagnostic tools to not only diagnose but also re-program a problematic vehicle can prove to be a tricky task. The range of offerings we have available takes the stress and time away from not being able to execute an efficient repair.

Manufacturer secure gateways, also known as gateway modules or simply gateways, are specialised electronic control units (ECUs) found in modern vehicles. They act as central communication hubs, controlling the flow of data between various vehicle networks and ECUs. Give us a call to find out what is the right tool for you to overcome a problem before it is one.

ADVANCED DRIVER ASSISTANCE SYSTEMS (ADAS) are electronic, sensor-based technologies in modern vehicles designed to increase safety, reduce accidents, and enhance comfort by minimizing human error. Core examples include adaptive cruise control, automatic parking, lane departure warning, and emergency braking. We supply the right equipment to manage the systems described.

TECHNICAL, SERVICE & INSTALLATION

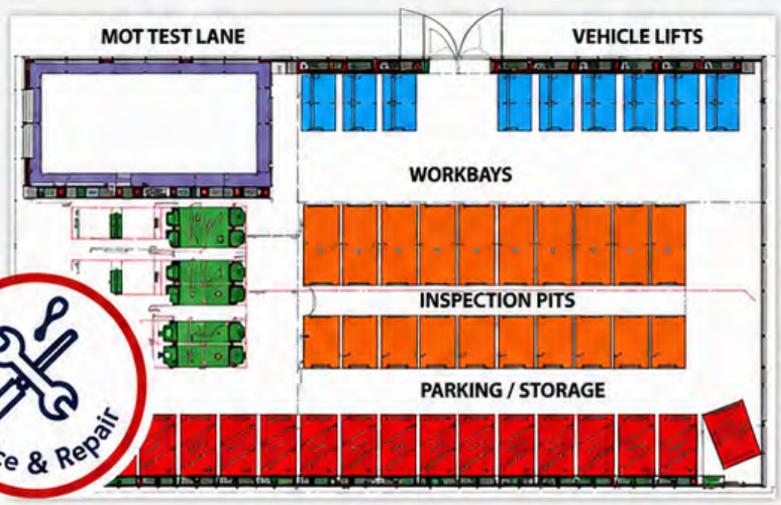
WES
WORKSHOP EQUIPMENT SOLUTIONS

We can prepare complete "turnkey" workshop designs including but not limited to,

- MOT test lanes
- Lubrication services
- Compressed air systems
- Fume extraction systems
- Inspection pits
- Lifting equipment layout

With over 60 years of automotive industry knowledge and experience, Workshop Equipment Solutions can supply, install & service the equipment for your workshop that fits your specification and requirements. Our workshop service and installation design facility can tailor your needs to the next step of your business transformation.

At Workshop Equipment Solutions we have experts who have unrivalled experience and knowledge of this complex subject area. We offer a consultancy service to architects and building designers and offer guidance not just on efficient workshop planning but also legislative requirements, up to date advice on the latest servicing and maintenance processes for equipment and workshop tooling.



FINANCE SOLUTIONS

WES
WORKSHOP EQUIPMENT SOLUTIONS

FINELY TUNED FINANCE

1. Choose your equipment and apply for finance

2. Receive a finance decision in as little as 4 hours

3. If accepted* – documentation to be signed and returned

4. Agreement begins after delivery / installation

ADVANTAGES OF BUYING YOUR EQUIPMENT ON LEASE

FROM AS LITTLE AS **£14** PER WEEK

- No need to pay the full cost of the equipment up front
- Leasing gives you access to higher quality equipment
- Forecasting your businesses cash flow becomes straightforward
- Your business can deduct the full cost of the lease payments from your taxable income
- Lease your equipment from as little as **£14** per week

SMALL TOOLS & STORAGE SOLUTIONS

WES
WORKSHOP EQUIPMENT SOLUTIONS

SPRING COMPRESSORS

Workshop Equipment Solutions supplies a comprehensive range of workshop tooling, storage systems and specialist equipment to support every aspect of your workshop operation.

From spring compressors and hydraulic presses to tool chests, workshop furniture and lifting accessories, we can provide reliable products from leading manufacturers to suit workshops of all sizes.

HYDRAULIC PRESSES

TROLLEY JACKS

TOOL CHESTS & CABINETS

STORAGE SOLUTIONS

PRODUCT RANGE

SPRING COMPRESSORS

- Heavy-duty workshop spring compressors
- Safe and efficient suspension servicing
- Suitable for passenger cars and light commercial vehicles

HYDRAULIC PRESSES

- Workshop presses from 10T to 100T+
- Ideal for bearings, bushes, shafts and fabrication work
- Manual, pneumatic and electro-hydraulic options available

TROLLEY JACKS

- Professional low-entry workshop jacks
- High lifting capacity and robust construction
- Suitable for cars, vans and commercial vehicles

TOOL CHESTS & CABINETS

- Complete storage systems and roller cabinets
- Professional workshop organisation
- Multiple sizes and configurations available

WORKSHOP FURNITURE

- Modular storage systems
- Stainless and heavy-duty worktops
- Wall cabinets, drawer units and shelving

EXPERT SERVICE & MAINTENANCE FOR YOUR WORKSHOP EQUIPMENT

We focus on service and maintenance to keep your equipment safe, compliant and reliable.

- Servicing & Maintenance
- Repairs & Breakdown Support
- Calibration & Compliance
- Safety Certificates
- Maintenance Contracts

WHY CHOOSE US?

EXPERIENCED ENGINEERS
Fully qualified engineers with years of industry experience.

FAST RESPONSE
Quick call-outs and efficient service to minimise downtime.

COMPLIANCE FOCUSED
We ensure your equipment meets all safety regulations.

RELIABLE SUPPORT
Ongoing support you can count on, whenever you need us.

WE KEEP YOUR EQUIPMENT WORKING, SO YOU CAN KEEP YOUR BUSINESS MOVING.

10+ YEARS EXPERIENCE

1000+ EQUIPMENT SERVICED

HIGH CUSTOMER SATISFACTION

FULLY INSURED

OUR SERVICES

Servicing & Maintenance
Routine servicing to keep your equipment running smoothly and reduce the risk of breakdowns.

Repairs & Breakdown Support
Fast response repairs and call-outs to get your equipment back up and running.

Calibration & Compliance
Accurate calibration and testing to ensure your equipment performs to manufacturer standards.

Safety Certificates
We provide all necessary certificates and reports for compliance and peace of mind.

Equipment Inspections
Thorough inspections to ensure your equipment is safe, reliable and performing correctly.

Maintenance Contracts
Planned maintenance packages designed to suit your business and budget.

WHATEVER THE EQUIPMENT, WE'VE GOT YOU COVERED.

Our engineers have the training and experience to keep your equipment performing at its best.
